

Blood Donors Wanted

MEN AND WOMEN

Healthy persons of both sexes between the ages of sixteen and forty-five years are required to act as donors of blood for transfusion.

In certain cases of injury, the patient's life can only be saved if blood transfusion is immediately available. Volunteers are wanted now to be tested and registered. In case of need, each would be asked to give only a small quantity of blood.

Men and women who are willing to be considered as blood-donors should apply at the Head Office of the Medical and Health Department, 15, Strada Mercanti, Valletta.
